

UNICITY NEIGENE INTENSIVE RECOVERY NIGHT CREAM

Recovery is important. Each of us needs to recover nightly from our busy days, and so we prioritize sleep. Athletes need to recover from intense races or competitions. People who suffer injuries need time to recover their strength and get back into peak shape.

Your skin needs to recover just as much as your brain or your muscles. Though you might not think about it, your skin spends all day regulating your body and protecting you from a variety of stressful environmental factors. Do you let it recover appropriately?

There's no better time to recover than when you're sleeping at night, which is why Neigene Intensive Recovery Night Cream works while you sleep to enhance skin elasticity and promote youthful skin. Revitalize and rejuvenate the skin with this nutrient-rich hydrating cream. The fresh creamy texture uses advanced science to make skin appear hydrated and rejuvenated. Intensive Recovery Night Cream can help your skin recover and feel ready for everything tomorrow throws at you.

BENEFITS

Works while you sleep.

Promotes elasticity in the skin surface. *

Combines peptide technology with liposomal actives to make skin appear hydrated and rejuvenated. *

Helps support healthy clear skin. *

SUGGESTED USE
