

UNICITY CONDITIONER

Many people do not use rinse because they are annoying or because they are oily hair. However, if you do not use the conditioner, hair loss after shampooing can cause your scalp to dry out or your hair to become rough.

With the same principle of applying lotion and essence to your skin after cleansing, you need to moisturize your hair and supply the hair

nutrients by using conditioner.

In particular, our hair is damaged a lot when it is frequently firmed and dyed or goes out for a long time, so using a conditioner is effective for hair health. Because the major component of the hair is composed of proteins, it is good to use a conditioner containing protein components.

BENEFITS

- ✓ Contains 11 amino acid components to help coat hair.
- ✓ Helps to increase the flexibility of the hair.

SUGGESTED USE

After shampooing, work evenly into wet hair with fingertips, paying special attention to ends or damaged areas.
Rinse thoroughly.
For best results, cleanse with Unicity Shampoo before conditioning.

TARGET CUSTOMER

Primary Target
: Current Unicity Customers.

Secondary Target
: People whose hair is damaged by frequent perm and dyeing.
People with hair split ends and easily tangled hair
People who want to buy a hair product for protein coating
